

When I Travel by Airplane

Airports are busy but cool places.

We have to look at signs and find our check-in counter.

We may have to wait in lines and be patient.

We show our passport or IDs and get our boarding passes.

We checkin our luggage
at the counter.

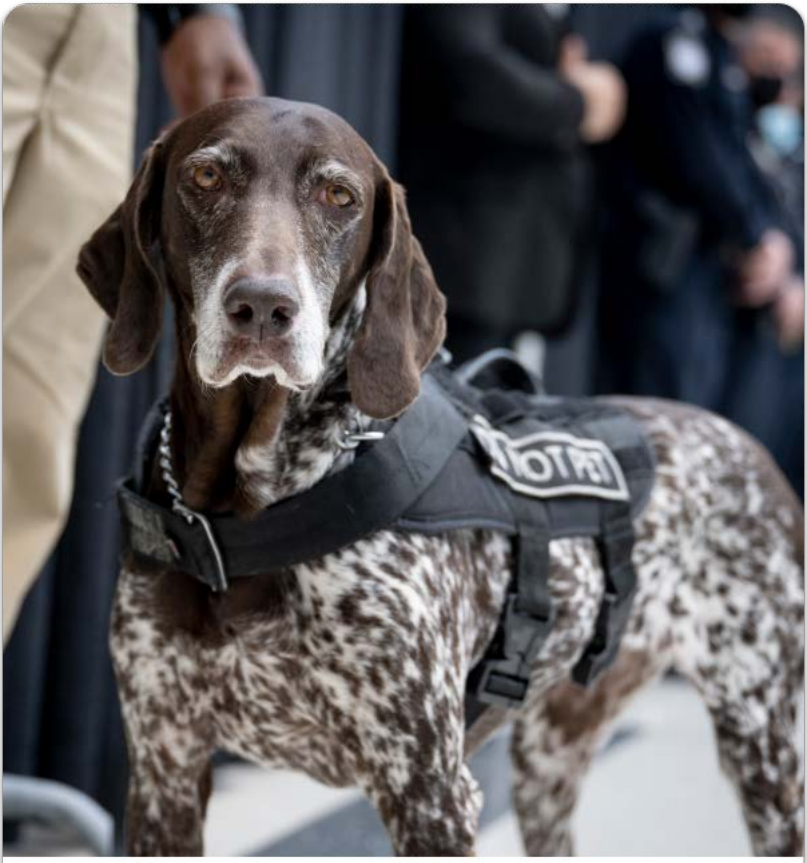

Our Luggage gets loaded into the airplane's cargo area

We look at the signs
to find our gate

We are going to meet the TSA agents and pass security check

There are security dogs. We are not supposed to distract them. They are working.

TSA agents examine our belonging through x-ray scanners

We have to put our belongings in the trays to go through x-ray scanners

We walk through scanners

Sometimes we go through
body scanners.

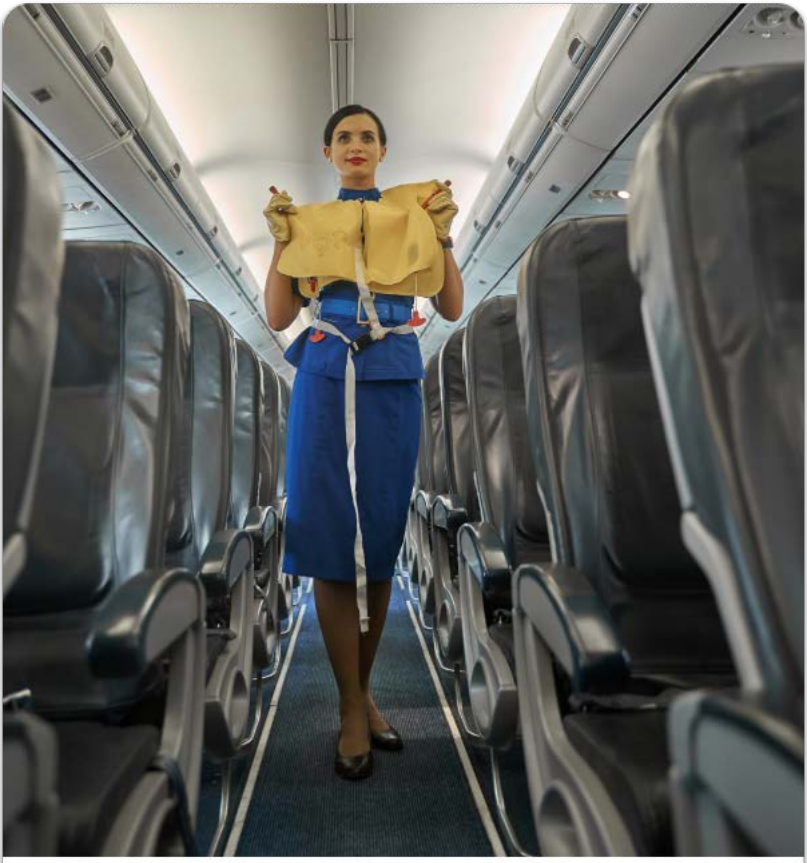

If something beeps the TSA agent uses a hand scanner to detect metal.

We can sit down and wait while waiting to board our plane.

When we board the plane we look for our seats and put our belonging on the overhead bins.

I have to listen carefully when the flight attendant shows us safety instructions.

I have to put my seatbelt on
to stay safe on the plane.

When the plane take off is fast, fun, and exciting.

If the plane is too loud I can use my headphone to reduce the noise.

I can play with my toys or play games or watch movies on the plane.

We pick up our luggage
when we land

And we go out of the airport
and to our destination.
Traveling by airplane is fun.

Awesome!
